

[INVITATION]

AR+ RFID Lab

State of the AR

A Retrospective of Research in Art and Design with Augmented Reality at the AR+RFID Lab

*The AR+RFID Lab, the Royal Academy of Arts The Hague (KABK) and the Bio-Robotics Lab of the TU-Delft invite you to the opening of the exhibition 'State of the AR' on **Monday 16 November at 16:00!** After this opening the exhibition can be visited until November 28.*

'State of the AR' is a retrospective exhibition of art and design that have been developed over the past three years in collaboration with the AR+RFID Lab at the KABK. The KABK's AR+RFID Lab specializes in researching the usability of new visualization techniques for art and design. The Lab collaborates closely with the Bio-Robotics Lab of the TU-Delft. For the many projects of the AR+RFID Lab that have been established with the collaboration of artists and designers please visit www.arlab.nl/projects.html.

A special component of the exhibition 'State of the AR' is the 'Augmented Exhibition' which can only be viewed with a special headset. **For the operation of the headset an expert will be present each day from 16.00 to 18.00.** At other times it is possible to watch along with an automated visitor. Visitors can also evoke 3D images on a monitor themselves, using AR-books. The long tradition of technical visualization methods that preceded AR can be seen at the 'Lanterna Magica' formation, where pieces from the Magic Lantern Museum in Scheveningen are exhibited.
